

Saluting Cartridges 105 mm

- Various sound levels
- No smoke – less pollution of the cannon
- Precious appearance
- Transport classification 1.4C for shipment by air
- NATO-registered

State receptions, royal birthdays, on the occasion of Ramadan celebrations, public holidays, commemorations, traditional events, etc: On a wide variety of occasions, the importance of the event is underlined and highlighted with gun salutes. They are without exception blank shots without a projectile, which merely produce a report, possibly in conjunction with smoke.

Saluting cartridges product range with primary packaging (cardboard container)

Product Description

Depending on the use, a higher or lower **sound pressure level** may be required.

Our saluting munition fires **smokelessly**, which is a great advantage in the maintenance of the gun. In addition, the shooting place does not become smoke-logged after firing multiple shots.

But we are also able to produce munitions with smoke – even coloured smoke.

Due to their special characteristics, the cartridges are classified as 1.3C or 1.4C, which even allows a faster and cheaper **shipment by air**.

Product and Shipping Data

The Hamberger saluting cartridges can either shipped by sea or even by air. Please contact us for more information about the shipment.
