

Smoke Body No. 7 – Red - 3 Minutes

Art.-Nr.: 0085063

- Produces intensive coloured smoke
- Colour: red
- Burn time: three minutes
- CE certified
- Electrical ignition

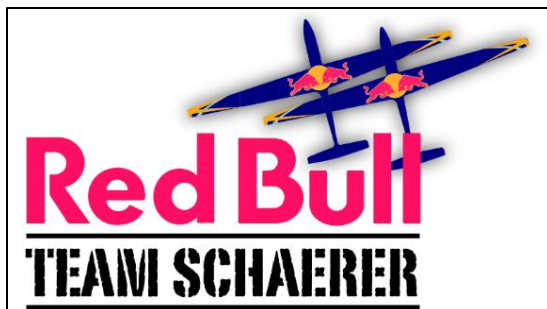

Smoke Body No. 7

Smoke Body No. 7 Red is particularly useful for parachutists, hang gliders, and aerobatic pilots who want to mark their figures and flying shapes in the air. Additionally, Smoke Body No. 7 is also used as a marking and demonstration tool for emergency teams and special deployment forces. Smoke Body No. 7 stands out in the market through its innovative long burn time.

Product Description

During a burn time of approx. three minutes, the colour-marking Smoke Body No. 7 develops intensive red smoke, which exits from two openings located on the front side.

The Smoke Body No. 7 can be ignited by means of a secured ignition source (e.g. 9 Volt battery). Almost immediately upon ignition, strong intensively red smoke is emitted.

Team Schaerer counts on Smoke Body No. 7 from Hamberger

Product Data	
Purpose:	Generation and emission of coloured smoke
Smoke colour:	Red
Ignition:	Electrical
Burn time:	Approx. 180 s
Safety distance:	0,5 Meter
Net explosive mass NEM:	175 g
Gross weight:	310 g
Length / diameter:	210 mm / 50 mm
Housing:	Environmentally friendly cardboard

Classification, CE, Category	
ADR:	1.4 G
UN number:	0197
Description:	Signals, Smoke
Category:	T1
CE Registration number:	2463-T1-0033
