Art.-No.: 00407500 (Fire plate)
 Art.-No.: 00851000 (Fire sheets, bag of 10)

- Immediate destruction of physical documents
- Very fast and reliable
- No readable remains
- Easy handling
- Particularly suitable for secret documents

Fire Sheets and Fire Plate

The fire plates and fire sheets serve for the very fast and reliable destruction of whole document folders. Due to the enormous heat, only ash and the metallic mechanism remain after less than one minute of a full folder.

The fire sheets can also be used to destroy envelopes with contents.

Product Description

Due to the lack of energy, paper that lies close to each other, such as that placed in a paper folder, burns very poorly or not at all.

The burning plates and sheets generate enormous heat and provide enough energy so that no readable residue remains from a full folder after less than a minute.

The application is very simple: Both products are placed in a defined pattern between the documents and then ignited by means of a built-in zipper.

A folder before, while and after the destruction

Product data	
Purpose:	Quick document destruction
Gross weight:	450 g (fire plate)
(Approx.)	400 g (10 fire sheets)
Net explosive weight:	370 g (fire plate)
(Approx.)	370 g (10 fire sheets)
Burning time:	≥ 50 sec
Safety distance:	ca. 5 m

Transport classification, UN number	
ADR:	1.3 G
UN number:	UN0430
Description:	Pyrotechnic for technical purposes
