

Saluting Cartridges 105 mm

- Various sound levels
- No smoke – less pollution of the cannon
- Precious appearance
- Transport classification 1.4C for shipment by air
- NATO-registered

State receptions, royal birthdays, on the occasion of Ramadan celebrations, public holidays, commemorations, traditional events, etc: On a wide variety of occasions, the importance of the event is underlined and highlighted with gun salutes. They are without exception blank shots without a projectile, which merely produce a report, possibly in conjunction with smoke.

Both the guns and the cartridges do not have any offensive or defensive capability.

Product Description

Depending on the use, a higher or lower **sound pressure level** may be required.

Our saluting munition fires **smokeless**, which is a great advantage in the maintenance of the gun. In addition, the shooting place does not become smoke-logged after firing multiple shots.

If desired, we can also produce munitions with coloured smoke.

Saluting cartridges product range with primary packaging (cardboard container)
