

Saluting Cannons

State receptions, royal birthdays, on the occasion of Ramadan celebrations, public holidays, commemorations, traditional events, etc: On a wide variety of occasions, the importance of the event is underlined and highlighted with gun salutes. They are without exception blank shots without a projectile, which merely produce a report, possibly in conjunction with smoke.

Both the Saluting cannon and Saluting cartridges do not have any offensive or defensive capability.

Saluting Cannon "M 635"

The M 635 calibre 75 mm is a cannon type which was already in use during the Second World War. Built as an exact replica of the original, this cannon is a reliable partner for traditional gun salutes.

Product Details
